9th World Meeting on Pharmaceuticals, Biopharmaceutics and Pharmaceutical Technology

Lisbon, 31st March to 3rd April 2014

ADRITELF

A.D.R.I.T.E.L.F (Associazione Docenti Ricercatori Italiani di Tecnologie e Legislazione Farmaceutiche) is a non-profit scientific society dedicated to pharmaceutical technology sciences as well as to related regulatory affairs. The association is involved in the promotion of education and training of young researchers in the field of pharmaceuticals and facilitates the collaboration among scientists by means of seminars, workshops and meetings, both at national and international level. ADRITELF is also involved in the continuous teaching improvement of the technology and legislation disciplines that are present in University Courses of "Pharmacy" and of "Chemistry and Pharmaceutical Technologies".

Lisbon, 31st March to 3rd April 2014

APTALIS Pharmaceutical Technologies

Aptalis is a wholly owned subsidiary of Forest Laboratories (NASDAQ: FRX) focused on improving health and quality of care by providing specialty therapies for patients around the world. Our pipeline of innovative, effective therapies for unmet medical needs is robust, including specialty pharmaceutical products for patients suffering from cystic fibrosis and gastrointestinal disorders.

Aptalis Pharmaceutical Technologies develops and manufactures enhanced pharmaceutical products based on its broad range of proprietary oral drug delivery technologies, including taste masking, bioavailability enhancement, and customized drug release. We utilize these technologies to develop novel prescription and OTC products that have advantages over existing products and address unmet medical needs. Our integrated R&D and manufacturing teams in the U.S. and Europe work with our partners from formulation through scale-up and commercial-scale manufacturing.

Sirius Analytical Ltd.

Sirius Analytical offers both instrumentation and CRO services for measurement of pK_a , $\log P/\log D$, Solubility and Dissolution in aqueous, solvent, biorelevant media and in the presence of formulation additives. Our unique solutions for automated supersaturation measurement reveal new insights about the pH-dependent supersaturation a compound can exhibit and how supersaturation may be enhanced or suppressed via the use of formulation additives and excipients. Our real-time pH control expertise can be used to experiment with co-crystal formation and analysis. With facilities in the US and UK Sirius offers global coverage with detailed and reliable analysis, expert staff and rapid turnaround.

UNITHER Pharmaceuticals

Unither is the Worldwide leader in non-injectable Sterile single-dose using
BFS technology.

Unither is a CDMO (Contract Development and Manufacturing
Organization) specialized in 5 dosage forms:

- Sterile unit-doses
- Liquid stick packs
- Powder stick-packs
- Effervescent tablets

Unither provides customized R&D services and Clinical batches
manufacturing on a dedicated state-of-the-art platform (Formulation,
Analytical development and validation, ICH stability studies, Extractables
and Leachables, Impurities characterization, Clinical batches, QC and QP
Release).

With a staff 1 200 people, 4 sites in France and 1 site in the USA, several
agreements from worldwide authorities Unither Pharmaceuticals provides
competitive, sustainable and innovative solutions to pharmaceutical and
generics companies.

The Group's mission is to capitalize on its existing offer of turn key
products and to develop Innovation in R&D.
